

**Everything about
Analytics here!**

Data Reporting with Qlik

We can bring data to life with live dashboards and reports and share insights across the organisation by connecting to various data sources. Extracting, analysing, and comprehending large quantities of data ensures that it is being presented in a logical manner, to make informed business decisions.

**Start your Analytical journey
with us.**

There are no prerequisites needed to attend this course.

**A short
course in
8 hours.**

What You'll Learn

Participants will learn how an enterprise tool like Qlik can be used to showcase data in a visually insightful manner. Participants will be given datasets for hands-on training throughout the workshop. We will be walking through the features of QlikView and Qlik Sense, the analytics workflow with a real-world case study to build reports to tell an insightful story.

**Learn how you can take data-driven
decisions!**

About the Course

These are the key takeaways that participants will gain:

- Understanding of Data Analytics
- Business Intelligence Roadmap
- How to create reports on Qlik Sense
- How to create reports on QlikView
- Best Practices in Industry

It's about your goals & your future!
